PharmLabs San Diego Certificate of Analysis

Sample **Polynesian Purp - THCv 10% Blend**

Sample ID **SD230207-045 (61223)**		Matrix **Concentrate**	
Tested for **Mako Inc.**			
Sampled **-**	Received **Feb 06, 2023**	Reported **Feb 28, 2023**	
Analyses executed **CANX**			

Laboratory note: The estimated concentration of the unknown peak in the sample is 7.75% | Currently PharmLabs laboratory can not confirm an unidentified peak in your chromatogram due to interference (only with highly concentrated D8 products) from which we believe to be either (+)d8-THC or d9-THC. At this time there are no reference standards available for (+)d8-THC. (+)d8-THC is a different compound from the main (-)d8-THC cannabinoid and, therefore, these two compounds may have different efficacies. Using the most advanced instruments and techniques available, the separation of (+)d8-THC and d9-THC is problematic for the scientific community as a whole. PharmLabs believes the unidentified peak to be a combination of (+)d8-THC and d9-THC with the majority, if not all, of the concentration being (+)d8-THC. Total (+/-) D8 Concentration is estimated to be: 75.40%
