PharmLabs San Diego Certificate of Analysis

Sample FLO - Munson Rosin - Indica

Delta9 THC UI THCa ND Total THC (THC + THCa) UI Delta8 THC 63.75%

	Matrix Concentrate (inhalable Cannabis Good)						
Tested for FLO							
Sampled -	Received Aug 10, 2023	Reported Aug 14, 2023					
Analyses executed CANX		Unit Mass (g) 2.0					

Laboratory note: The estimated concentration of the unknown peak in the sample is 8.03% | Currently PharmLabs laboratory can not confirm an unidentified peak in your chromatogram due to interference (only with highly concentrated D8 products) from which we believe to be either (+)d8-THC or d9-THC. At this time there are no reference standards available for (+)d8-THC. (+)d8-THC is a different compound from the main (-)d8-THC cannobinoid and, therefore, these two compounds may have different efficacies. Using the most advanced instruments and techniques available, the separation of (+)d8-THC and d9-THC is problematic for the scientific community as a whole. PharmLabs believes the unidentified peak to be a combination of (+)d8-THC with the majority, if not all, of the concentration being (+)d8-THC. Total (+/-) D8 Concentration is estimated to be 63.75%

CANX - Cannabinoids Analysis Analyzed Aug 14, 2023 | Instrument HPLC-VWD | Method SOP-001 The expanded Uncertainty of the Cannabinoid analysis is approximately *3*.806% at the 95% Confidence Level
